KOREA'S LEADING
FOOD PACKAGING
SOLUTIONS DURE

DURE CO., LTD.

About us

DURE

“

Dure stands as the leading food packaging manufacturer in Korea.
We diligently craft our products to cater to our customers' needs,
leveraging a diverse range of product lines.
Our commitment is to foster mutual growth with our customers.
Moreover, our focus is on creating eco-friendly products,
utilizing sustainable materials like biodegradable PLA, PHA and Paper.

01

Dure is at the forefront of facilitating a shift towards a more circular economy, propelled by cutting-edge innovation. We are committed to designing eco-friendly products across a broad spectrum of categories. Our eco-friendly product range, which includes biodegradable PLA, PHA, paper, and pulp, is continually expanding. Concurrently, we are also endeavoring to pioneer the development of new sustainable materials.

02

DURE prioritizes 'quality' and 'diversity' in our products.
We focus on discerning customer needs, aiming to deliver optimized and tailor-made products.
It is our aspiration that this approach will foster reciprocal growth with our customers.

03

DURE operates its own in-house design research lab.
We are perpetually committed to enhancing customer satisfaction,
and continually strive to deliver superior products and services.

Design R&D PAPER

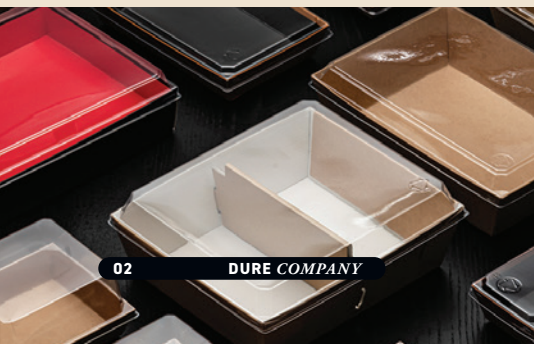

Paper cup production line : 28 units

Production capacity per month : about 4 million

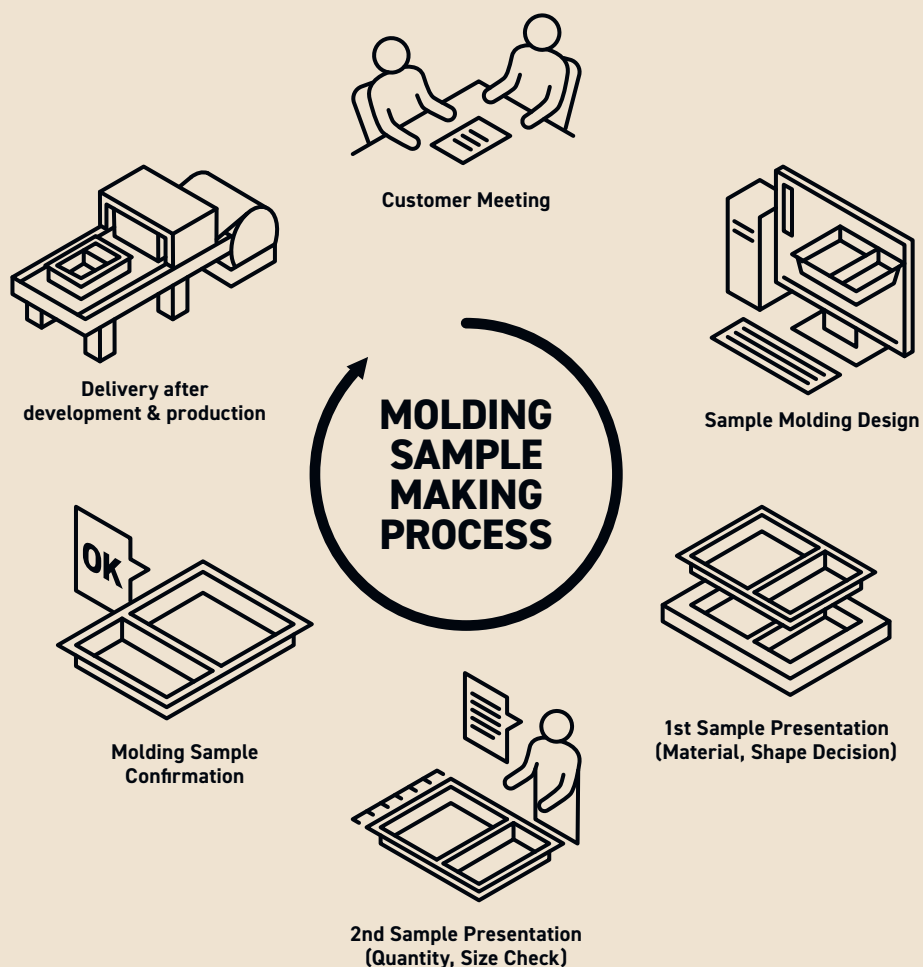

Paper tray production line : 21 units

Production capacity per month : about 3.3 million

As of 2025, more than 4,000 tons of paper inputs for production
 (About 270 million pieces based on DURE's 37oz paper cups, equivalent to 1,500 containers based on 40HQ)
 Develops more than 300 new products on average per year
 (DURE's Design centers make it possible to respond to the customization of customers)

Design R&D MOLDING

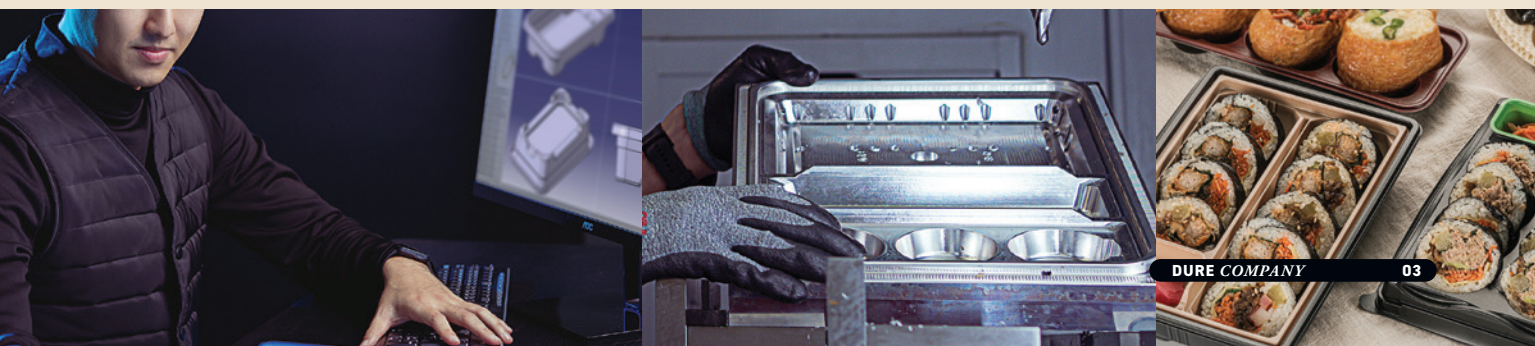

**Forming Container Assembly Line :
26 units**

Production capacity per month : about 1,260 tons
(40HQ containers 200 units)

**Number of molds developed :
more than 5,000 pieces**

DURE's Design Centers make it possible
to develop and customize it

Annual average of about 360 new mold developments

MATERIALS INTRODUCTION

Material Name	Mark	Biodegradable	Hot Resistance	Impact Resistance	Grease Resistance	Microwave
PET		×	×	○	○	×
PP		×	○	○	○	○
PAPER		×	△	△	△	○
PLA		○	×	×	○	×

PET

resin code #1

PET is a lightweight, recyclable plastic that can withstand temperatures of around 60-70°C(140-158°F). While it is typically used at room temperature, its thermal and cold resistance can be improved by blending with additives. Its water and impact resistance make it ideal for general F&B packaging.

PP

resin code #5

PP has excellent heat resistance and durability. It is optimized for use in microwaves and can withstand temperatures up to 110°C(230°F), making it suitable for hot food applications.

PAPER

Made from natural materials, Paper offers great printability. With our PE coating, it becomes water- and oil-resistant, significantly enhancing durability. A clean, simple choice that brings a natural touch to your packaging.

PLA

resin code #7

PLA (Poly Lactic Acid) is a bio-based and compostable material. It is ideal for cold food such as salads, but should be avoided in high-temperatures. Make a convenient and eco-friendly choice with PLA.
