About us

DURE

Dure Co., Ltd. is Korea's leading food container manufacturer, setting new standards in the packaging industry through differentiated technology and quality innovation.

Operating our own design team and a dedicated product development R&D center, we provide optimal solutions tailored to meet our customers' specific requirements.

Beyond the role of a simple manufacturer, we are growing alongside our clients as a key partner dedicated to enhancing their brand value.

In particular, we are concentrating our capabilities on developing eco-friendly packaging solutions utilizing sustainable materials, ranging from paper to biodegradable PLA.

Through innovative products that lead market trends and customer-centric service,

Dure is committed to becoming a global leader pioneering the future of the eco-friendly packaging market.

(주) 두레

Design R&D PAPER

Paper cup production line : 28 units

Production capacity per month : about 4 million

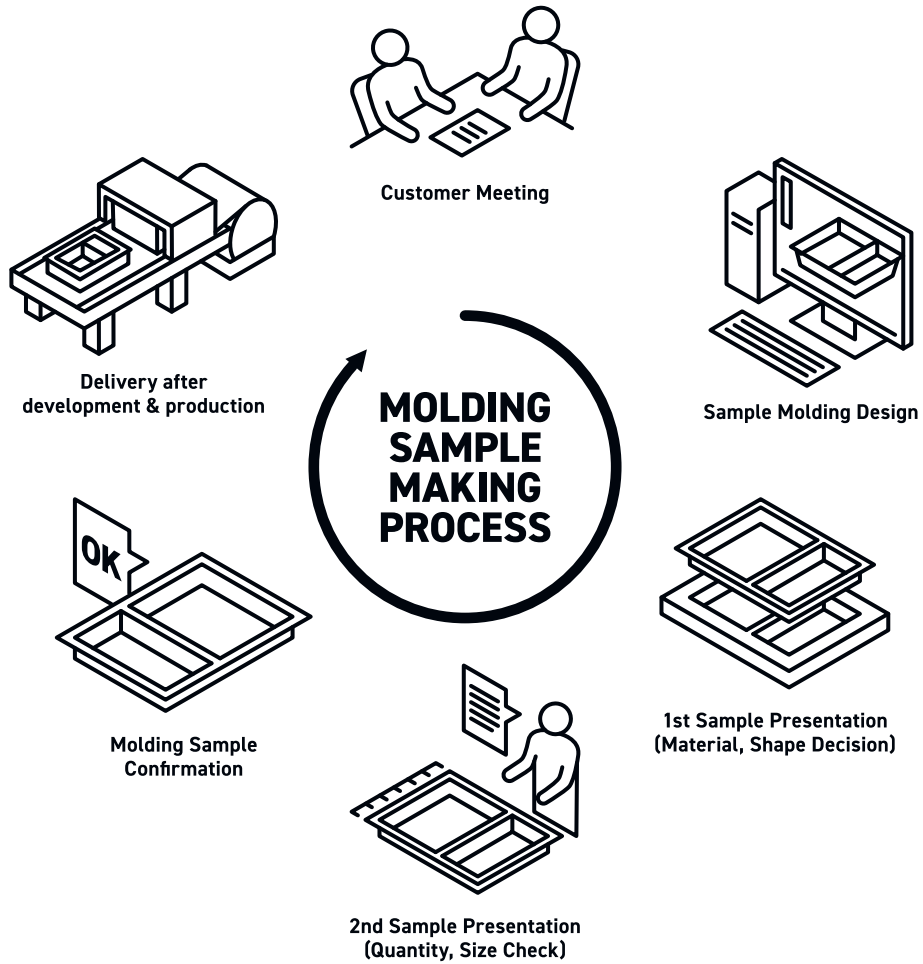

Paper tray production line : 21 units

Production capacity per month : about 3.3 million

As of 2025, more than 4,000 tons of paper inputs for production
(About 270 million pieces based on DURE's 37oz paper cups, equivalent to 1,500 containers based on 40HQ)
Develops more than 300 new products on average per year
(DURE's Design centers make it possible to respond to the customization of customers)

Design R&D **MOLDING**

**Forming Container Assembly Line :
26 units**

Production capacity per month : about 1,260 tons
(40HQ containers 200 units)

**Number of molds developed :
more than 5,000 pieces**

DURE's Design Centers make it possible
to develop and customize it

Annual average of about 360 new mold developments

MATERIALS INTRODUCTION

Material Name	Mark	Biodegradable	Hot Resistance	Impact Resistance	Grease Resistance	Microwave
PET		×	×	○	○	×
PP		×	○	○	○	○
PAPER		×	△	△	△	○
PLA		○	×	×	○	×

PET

resin code #1

PET is a lightweight, recyclable plastic that can withstand temperatures of around 60-70°C(140-158°F). While it is typically used at room temperature, its thermal and cold resistance can be improved by blending with additives. Its water and impact resistance make it ideal for general F&B packaging.

PP

resin code #5

PP has excellent heat resistance and durability. It is optimized for use in microwaves and can withstand temperatures up to 110°C(230°F), making it suitable for hot food applications.

PAPER

Made from natural materials, Paper offers great printability. With our PE coating, it becomes water and oil-resistant, significantly enhancing durability. A clean, simple choice that brings a natural touch to your packaging.

PLA

resin code #7

PLA (Poly Lactic Acid) is a bio-based and compostable material. It is ideal for cold food such as salads, but should be avoided in high-temperatures. Make a convenient and eco-friendly choice with PLA.
